

WIND

Masayuki Kurokawa

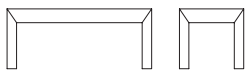

The wind tea table breaks from traditional Chinese tea table. With its wing-shaped legs and aerial, willowy structure, it recalls the motion of a bird flying in the sky, carried by the wind. The piece pairs together the asian philosophy of life and the essence of nature, representing a harmonious integration of form and function.

STRUCTURE

Whole piece in veneer, one long side of the top profile in metal

FINISHING

Whole piece in smoked oak, stained oak or natural walnut
